## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3 and 6 are rejected under 35 U.S.C. 102(e) as being anticipated by Kim et al. (Kim) (U.S. Patent No. 6,175,396).

As to claims 1 and 6: Kim discloses a liquid crystal display device comprising optical sheets (3) included in a backlight assembly (lamp and 2) (col.6 lines 32-34), a main frame (1) mounted with the backlight assembly and at least one shaft member (40) installed at the main frame to fix the optical sheets. Kim also discloses that the optical sheets (3) included in the backlight assembly having holes (300) therein configured to affix to the shaft (Fig. 6).

As to claims 2-3: Kim discloses that each of the optical sheets (3) is provided with a hole (301) through which the shaft member (40) passes (col.7, lines 29-30) as claimed in instant claim 2. Kim also discloses that the main frame is provided with at least one stepped hole (301) in which the shaft member is provided as claimed in instant claim 3.

***Claim R ejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 4-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kim in view of Yarita et al. (Yarita) (U.S. Patent No. 6,411,353).

a. Kim discloses a panel guide (50) for surrounding the backlight assembly and the main frame (1). Kim however, does not disclose a silicon pad or a silicon pad provided with a hole. Yarita on the other hand, in disclosing a mounting configuration of a liquid crystal panel comprising several optical sheets (SPS, PRS, GLB, RFS and PNL), a main frame (MCA), a panel guide sheet (SHD), discloses sleeves (pads) (SLV) with small holes that are made out of silicon rubber (col. 24, lines 1-13). Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to adapt the specific sleeves (pads) as disclosed by Yarita to the liquid crystal panel of Kim for alignment of the sheets with the main frame (co. 24, lines 8-9).
